

LWPS and TACTICAL WATER

Facts and Figures

- Water weighs 8.36 lbs per gallon
- 4,469 lbs of water at 8.36 lbs per gallon is 535 gallons
- LWPS System weighs 2,705 lbs and Quadcon weighs 1,764 lbs Total 4,469 lbs
- At 5.2 gallons per day per service member, that would support 103 service members for 1 day
- Once placed, LWPS water production of 2,500 gallons per day supports 480 service members for 1 day
- LWPS will use 25 gallons of fuel for 20 hr. production
- Resupply of 538 gallons will require (?) gallons of fuel – dependent on supply method
- Water for service members in OEF costs DoD \$4.69 per gallon delivered
- Lightweight Water Purification System costs \$184,900.00
- LWPS Reliability testing was stopped at 1,700 hrs. with no essential equipment failure
- LWPS water production for 1,700 hrs. at 150 gallons per hour is 255,000 gallons
- LWPS cost of \$184,900.00 divided by production of 255,000 gallons is \$0.72 per gallon*
- LWPS cost of \$184,900 divided by \$4.69 per gallon is 39,424 gallons
- LWPS water purification production capability is 2,500 gallons per day
- LWPS pays for itself in 15 days. *

*Operational POLS not added to LWPS cost

NSN 4610-01-572-8283
