

PRODUCT

LWPS

Lightweight Water Purification System

Designed and manufactured for the U.S. Marine Corps.

Deployed for production of potable water for drinking, hygiene and sanitation requirements. An economical and secure alternative to bottled water.

All Source Capable™ - Purify water from any source - ocean, lake, river, stream, including water contaminated with nuclear, biological or chemical (NBC) contaminants.

Up to 300 GPH from fresh water source. Up to 150 GPH from seawater source. Additional modules configurable to increase water production by 80% or more.

No external power source required. – lower fuel consumption – multi-fuel engines

Reliability and maintainability exceeded USMC test requirements.

Easy to use – Minimal training required. Training program conducted by certified former military trainers.

BUSINESS OVERVIEW

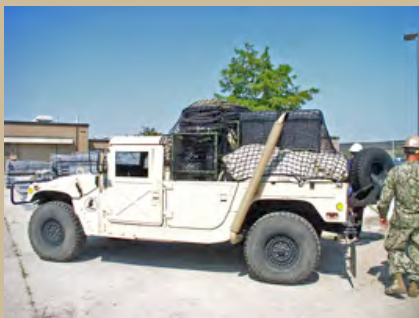

TerraGroup Corporation specializes in the design, engineering, and manufacturing of portable/tactical, emergency water purification, storage and distribution systems for military field applications, potable water for disasters, emergency water supply and nuclear, biological and chemical (NBC) decontamination. TECWAR® systems are self-contained, portable, modular, scalable, lightweight and cubed for easy transport. They are designed for rapid response, remote locations, and expeditionary teams to provide potable water and hygiene/sanitation support.

Lightweight - 2 person lift for every module. Pack out and operational in less than 40 minutes with only one operator required.

Transportable by UH-60 Blackhawk helicopter, C-130 Air Transport, HMMWV, QUADCON, TRICON, pick-up truck, and trailer.

Hardened for any environment. No special tools required.

PAST PERFORMANCE

- ✓ Successfully fielded by the USMC, US Navy and SOCOM since 2009
- ✓ OEM Support – 99.6% DLA Silver rating award recipient
