TACTICAL and FIRST RESPONSE WATER PURIFICATION SYSTEMS

# MPRO<sup>®</sup> 60HDX<sup>™</sup>

## EXTENDED CAPABILITY MODULES

### • Product Water Chlorinator

The Chlorine Injector injects a measured amount of chlorine into the product water to disinfect the water and help prevent the growth of harmful bacteria in the storage system. The Includes a Case, Chlorinator, two –7.5 ft. hoses, Chlorine tank, and premeasured Chlorine bottles. The MPRO<sup>®</sup> HDX Series Water Chlorinator ensures the Free Available Chlorine (FAC) in the product water meets Military Field Water Standards (MFWS) outlined in TB MED 577 and ATP 4-44/MCRP 3-17.7Q, Water Support Operations.

### • Product Water Storage

Storage bladders receive, store, and issue drinking water produced by the MPRO<sup>®</sup> 60HDX<sup>™</sup>. Each Product Water Storage Bladder is shipped with a Case, Bag adapters, and Distribution hoses.

Pictured: 3 100 gallon bags with bag adapters in container

### • Distribution Kit

The distribution kit is an optional external pumping system, which will distribute the product water produced by the MPRO<sup>®</sup> 60HDX<sup>™</sup> into various capacity bladders, a personal hydration system, Jerrycan or a similar storage system. Includes a Case, Distribution Pump, two – 7.5-foot Distribution hoses, Power cables, and a Distribution nozzle.

### • Nuclear Biological Chemical (NBC) Module

MPRO<sup>®</sup> 60HDX<sup>™</sup> will decontaminate source water which contains NBC agents; the reverse osmosis elements remove most NBC agents; however, safe levels are not assured without the use of a NBC filter. The NBC module has two tanks one contains ion exchange resin, used for removing nuclear and chemical agents; the other tank contains carbon; used for removing chemical and biological agents. The NBC filter is set up in the product line between the MPRO<sup>®</sup> 60HDX<sup>™</sup> and the product water storage bladders, a personal hydration system, Jerrycan or a similar storage system.
